

## ROOFING, WINDOWS and MORE

In 2009, we were in the need of replacing our roof along with wanting to up-grade some of our existing double-pane windows on our Log home. We looked at and discussed our needs with a number of suppliers at the Toledo home show that spring. As summer approached we began obtaining quotes for the various things we wanted done. Some companies could do this, and some could do that. A few said they could do it, but I just wasn't comfortable with the "oh, we can do that too" answer sometimes given.

Tri-State didn't hesitate, and instilled confidence in their ability to provide what we were looking for in a turnkey approach to all our needs. The final work project included a new roof, (with full tare-off) new sliding glass doors, five new high efficient windows and siding of two large roof dormers.

We were very pleased from the beginning steps in material selection to the end of the project, with the timely and professional service from Tri-State and will certainly contact them again when the need arises.
